- Can be designed with **customised or ArtCollection** motifs
- **State-of-the-art technology**, thought through to the last detail
- **Top washing and drying results**

➤ PRESENT YOUR CAR WASH IN A STYLISH NEW LOOK!

➤ In the Cyclo design, the current version of the car wash features eye-catching LED elements on both side doors.

➤ DESIGN

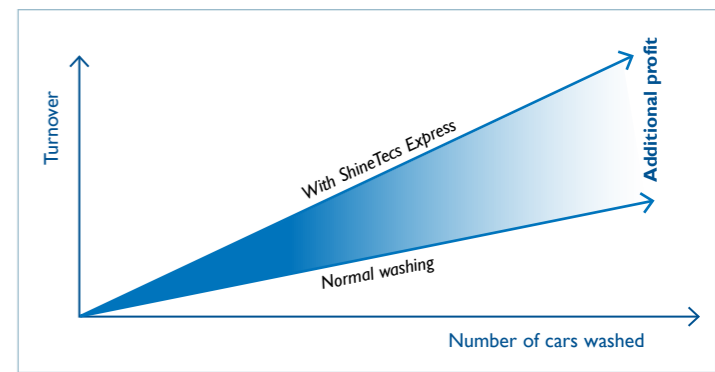

➤ Various designs available. Customised designs are possible upon request. We would be pleased to help you with your design.

➤ NEW BUSINESS OPPORTUNITIES FOR YOUR WASHING BUSINESS

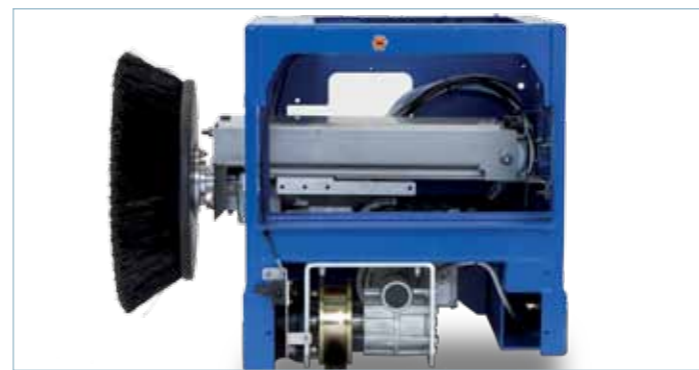

➤ The high-quality and innovative ShineTecs washing programme enables you to turn satisfied customers into regular customers.

➤ With the ShineTecs Express concept, you create high-quality premium wash option in the shortest washing time.

➤ TOP QUALITY AND LONG SERVICE LIFE

➤ Thanks to the 21 inch wheel wash brush, you achieve better washing results and win new customers: e.g. motorists whose cars are fitted with large wheel rims.

TEST WINNER
ADAC-MOTORWELT. Comparative test "Washing Materials" issue 02/03

➤ SofTecs® washes gently without wear. This maintains the shine and wins over even the most demanding of customers.

Technical advantages from which your business benefits

➤ SOFTCARE JUNO CLASSIC

Design: Basic

➤ SOFTCARE JUNO CLASSIC "EDITION SHINETECS EXPRESS"

➤ CONSTANT CONTACT PRESSURE – HIGH RELIABILITY

Precision measurement and control features regulate the correct, safe distance to the vehicle. The washers always work with constant contact. The contour data stored during the wash are used for performing efficient, contour-following, rapid drying.

➤ ALL-ROUND HIGH PRESSURE – OPTIMUM PRE-WASH

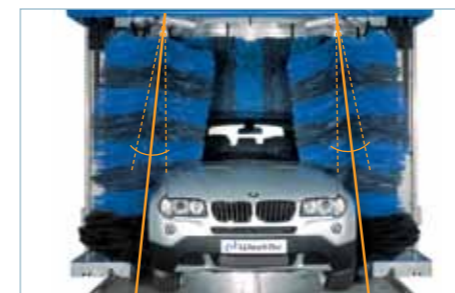

The optional, contour-following high pressure system ensures effective pre-washing close up to the vehicle. Coarse particles of dirt are rinsed off with gentle power.

➤ IDEAL SPEED – GREATER CUSTOMER CONFIDENCE

Frequency control on the movement and lifting drives for gentle, smooth running and infinitely adjustable speeds. Components are subjected to less stress and the car wash runs smoothly confirming to customers that the machine is safe to use.

➤ ADAPTED SIDE WASHERS – COMPLETE WASH AND CLEAN ALL-ROUND

During the washing process, the side washers are tilted inwards – at an angle that is automatically adapted to the vehicle shape. This ensures outstanding washing results for all vehicle shapes.

➤ SWIVELLING ROOF NOZZLE – MORE EFFECTIVE DRYING

The roof nozzle, optionally available in a swivelling version, enhances the drying result at the front and rear of vehicles.

➤ CONSTANT SELF MONITORING – RELIABLE CONTROL

The system constantly monitors the important major components. Thanks to self diagnostics, breakdowns can be avoided before they occur and downtime can be minimised.

Your options for more business

➤ SHINETECS® EXPRESS – THE REVENUE BOOSTER FOR YOUR BUSINESS

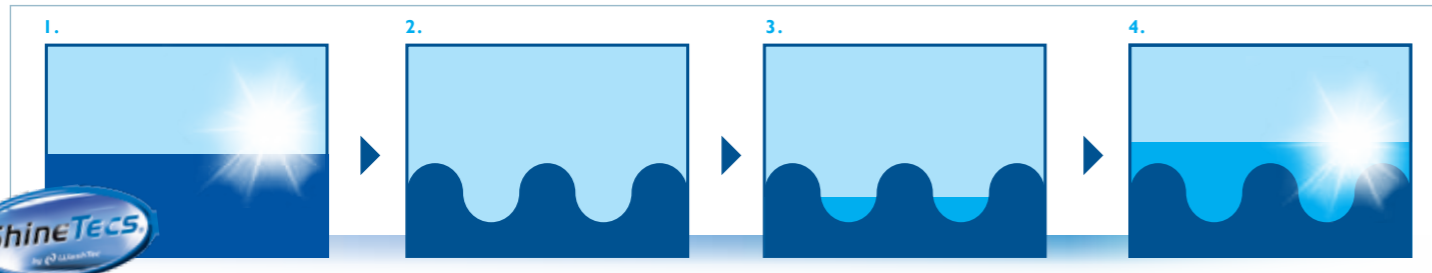

Shine programmes help preserve vehicles and ensure higher sales. With the ShineTecs® premium option, your car wash can complete the full premium wash programme in under 5 minutes.

The world unique 'repair effect' achieves noticeably higher shine than conventional polish and wax programmes. Thanks to the patented acrylic ionic formula, ShineTecs strengthens the protective layer on the paintwork with each wash. The new and innovative ShineTecs programme can also be used for upgrading the range of programmes you offer and for boosting your average price.

➤ SHINETECS® – INNOVATIVE PAINTWORK PROTECTION WITH THE 'REPAIR EFFECT'

1. New car paintwork has a smooth surface in the transverse section. Light can reflect to the maximum effect and the car shines.

2. When exposed to everyday driving, surfaces pick up microscopic, fine dents and scratches. The reflectivity and the shine diminishes.

3. ShineTecs® fills in these tiny dents and scratches. The colourless acrylic ionic protective layer cures in a matter of hours and remains permanently on the paintwork!

4. With each further wash, the new protective layer becomes even stronger. The vehicle's paintwork shines like new again!

➤ NEWS IN THE CAR WASH

You can install the modern LED banner display above the entrance to your car wash. This enables you to inform your customers while they wait about further special offers and promotions.

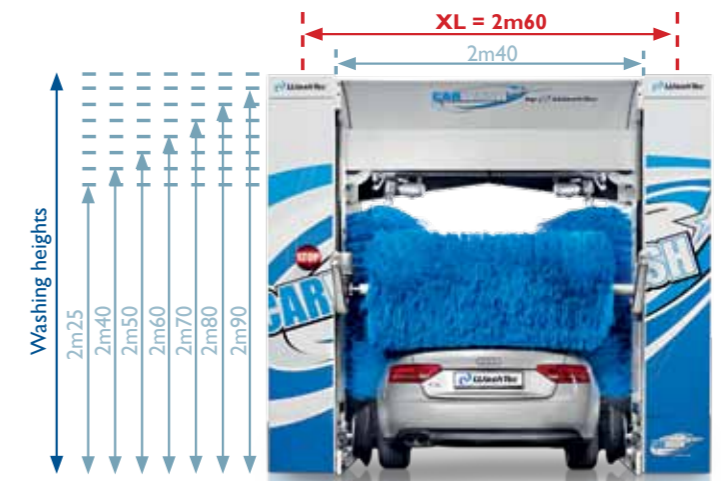

➤ SEPARATE LED-DISPLAY

The high illuminating power enables you to advertise your washing business from afar by using a freestanding gantry. The banner display is in white and is simple to programme with the ProfitManager-Software.

➤ PERFECT DIMENSIONS – MAXIMUM BUSINESS

- Ideal washing heights of 2.25 m; 2.40 m; 2.50 m; 2.60 m; 2.70 m; 2.80 m and 2.90 m – perfectly sized for current vehicle dimensions.
- Optionally available in the new, wider frame width of 2.60 m, now also for new types of vehicles, e.g. saloons, vans and off-road vehicles.
- By making full use of the available wash bay height, it is possible to exploit more business potential.

SoftCare Juno Classic

➤ CONTROL TERMINALS – NUMEROUS VARIANTS OFFERING CONVENIENCE AND ADDITIONAL BENEFITS

➤ CONTROL TERMINAL

Terminal for wall mounting. Highly affordable solution for a user-friendly input unit.

- **MultiBox** – three functions in one module:
- Printing wash tickets
- Preparation and checking of transponder cards
- Remote control of the car wash

➤ CODE

Attractive terminal for wall mounting or ground fastening. Code input via keypad, operating mode with or without cable connection, registration of all washing programmes.

- **MultiBox**: Code output device for the POS area.

➤ CODE + CARD

Combined solution for all applications – Individual wash via code with registration, multiple and prepaid tickets (without time limit) with robust transponder cards.

- **MultiBox**: Easy generation of washing vouchers via the printer, also preparation and checking of transponder cards

➤ CODE + SCAN

The modern solution for simple operation of the car wash using a voucher and scanner, wear-free reading, single, multiple and prepaid voucher function, happy hour function.

- **MultiBox**: Easy generation of washing vouchers via the printer.

➤ PROFITMANAGER

The ProfitManager software provides a convenient and simple means of managing one or multiple car washes. Preparation of statistics, programming of wash tickets and customer management and LED banner display are just a few of the options available to you with ProfitManager.

➤ WEB CONNECTION

The MultiBox permits constant access to the car wash parameters and POS system, for monitoring and data retrieval via DSL connection (cable/router), or alternatively via GSM/GPRS (wireless).
